

ULTRA PULSE

delivering healthy alternatives

Product Description:

UltraPulse puffed green lentils are a natural ingredient, made in Australia from locally grown lentils that are free of any genetic modification. High in protein and other nutritional components, they are an environmentally friendly, healthy, and cost-effective alternative to other commercially available puff products.

Product Value Benefits:

UltraPulse puffed green lentils provide food manufacturers the opportunity to incorporate a cost-effective source of high protein puffed legumes into innovative and healthy food products.

Product Use & Application:

UltraPulse puffed green lentils can be incorporated into processed foods to enhance nutritional properties and/or serve as a functional ingredient. Puffing of the lentils creates a light and crunchy texture, making them ideal for inclusion in a whole-grain bread mix, muesli bar, breakfast cereal, trail mixes or as a stand-alone snack.

Pack Size:

Product is available in the following pack sizes:

- 15kg multi-walled, paper bags

Storage Conditions & Shelf Life:

12 months from date of manufacture (store in cool & dry conditions).

Puffs - Green Lentil
