

ULTRA-PULSE

delivering healthy alternatives

Product Description:

UltraPulse Fibre is a natural ingredient, made in Australia from locally grown chickpeas that are free of any genetic modification. High in dietary fibre and other nutritional components, it is an environmentally friendly, healthy, and cost-effective alternative to other commercially available fibre sources.

Product Value Benefits:

UltraPulse Fibre provides food manufacturers the opportunity to incorporate a cost-effective source of high dietary fibre into innovative and healthy food products.

Product Use & Application:

UltraPulse Fibre can be incorporated into processed foods to enhance nutritional properties and/or serve as a functional ingredient. Product flavour and aroma are not affected by the incorporation of UltraPulse Fibre.

Pack Size:

Product is available in the following pack sizes:

- 1 tonne bulk bags
- 25kg multi-walled, paper bags

Storage Conditions & Shelf Life:

12 months from date of manufacture (store in cool & dry conditions).

Chickpea Fibre
